

# TIFFANY SMILEY'S AGENDA FOR ECONOMIC RECOVERY AND REFORM

## The Mission

*“My Agenda for Recovery and Reform has one simple aim: to turn crises into hope for all Washingtonians. As a triage nurse, I know how to take on and fix crises and that’s exactly what I’ll do in the United States Senate. From skyrocketing inflation to an oncoming recession, our economy is going in the wrong direction. Economic recovery and reform means putting more in the pocketbooks of the middle-class and enacting commonsense ideas that take advantage of Washington’s strengths in the global competition for jobs and investment. This agenda will ensure that hope is on the horizon for all workers and their families.” - Tiffany Smiley*

## WE CAN ACHIEVE ECONOMIC RECOVERY BY:

- **Preventing the IRS from harassing middle-class families and small businesses** with the 87,000 agents they plan to hire to investigate American taxpayers
  - It makes NO SENSE to increase taxes and government spending as our economy slides into a recession, but that is exactly what Senator Murray has done. She voted **FOR** more IRS agents while also voting **AGAINST** a measure to prevent those same agents from targeting American families making less than \$400K.
  - If prosecutors have found a way to not put violent offenders in jail, then I think the IRS can find a way to not harass middle class Americans and small businesses.
- **Reducing wasteful spending** that has caused inflation and ensuring that the government **never pays able-bodied workers more to stay at home** than go to work.
  - A key to lowering inflation is reducing our deficit and ensuring our economy stays strong with an active and engaged workforce.
- Permanently extending the 2017 **tax cuts for the middle class** and paying for it by permanently extending the cap on state and local (SALT) deductions, preventing the rich in high-tax states like California from lowering their tax bills.
- **Pursuing free and fair trade agreements** like USMCA that support nearly a million Washington jobs and protect Washington workers, manufacturers and farmers from unfair trade practices.
  - As Washington’s senator, I will work for agreements that expand international market access for American goods and ensure a fair grading system that does not disadvantage American growers.
